How To Report Partial Eta Squared:

Designing and Reporting Experiments in Psychology Peter Harris, Matthew J. Easterbrook, Jessica S. Horst, 2021-08-20

This book will help undergraduate psychology students to write practical reports of experimental and other quantitative studies in psychology. It is designed to help with every stage of report writing and provides a resource that students can refer to throughout their degree up to and including when writing up a final year undergraduate project. Now fully updated in its fourth edition, this book maps to the seventh edition of the APA guidelines and offers more comprehensive advice, guidelines, and recommendations than ever before. Students will benefit from coverage of different forms of quantitative study, including online studies and studies that use questionnaires as well as experiments. A range of handy test yourself questions with answers at the end of the book, self-reflection questions to prompt deeper understanding, summary sections that articulate the main points, and provide a useful revision aid. An Index of Concepts indicating where in the book every concept is introduced and defined. Updated advice on how to find and cite references. Expanded coverage of ethics in quantitative research, including how to write ethically. Common mistake symbols flagging areas where it's easy to be caught out. Peter Harris is Emeritus Professor of Psychology at the University of Sussex, UK, where he led the Social and Applied Psychology Group. He has taught research design and statistics for many years. He has published extensively in social and health psychology. Matthew J. Easterbrook is Senior Lecturer in Psychology at the University of Sussex, UK. He has taught statistics at a national and international level. Jessica S. Horst is Reader in Psychology at the University of Sussex, UK, where she is also the Director of Teaching and Learning. She has taught research methods in both the USA and the UK.

Statistics for the Behavioral Sciences Gregory J. Privitera, 2011-09-07. *Statistics for the Behavioral Sciences* is an introduction to statistics text that will engage students in an ongoing spirit of discovery by illustrating how statistics apply to modern-day research problems. By integrating instructions, screenshots, and practical examples for using IBM SPSS Statistics software, the book makes it easy for students to learn statistical concepts within each chapter. Gregory J. Privitera takes a user-friendly approach while balancing statistical theory, computation, and application with the technical instruction needed for students to succeed in the modern era of data collection, analysis, and statistical interpretation.

How To Do Research Jane F. Gaultney, Hannah D. Peach, 2015-12-17. Designed to help students make the leap from learning about research to doing research, this manual provides an easy-to-understand walkthrough of the entire research process, from selecting a topic and conducting a literature review through presenting an APA-style paper or presentation. All of the 15 cross-disciplinary labs included are appropriate for use in the social, behavioral, and health sciences and follow a consistent format: objective description of a journal article, canned data examples of what output should look like, pointers on interpreting the output, and a suggested activity for those who wish to collect their own data.
