Extreme Environment Ivo Vegter, 2012-09-05 Extreme Environment promises to provoke fresh and spirited debate about the modern environmental movement and the many ways in which environmentalism media economics public policy and the politics of liberty intersect In order to reduce poverty and continue to raise living standards requires a sensible balanced approach to a healthy productive environment No country but especially not those in the developing world can afford to be manipulated by the self interested moralising and alarmism perpetrated by some special interest groups Exaggeration by environmentalists many journalists and even some scientists causes undue fear and anxiety among those who don't already dismiss the green lobby for crying wolf Worse misinformation affects regulation and policymaking in ways that actively harm developing economies Starting with well researched work questioning the claims of opponents to shale gas drilling or fracking Ivo Vegter argues that public opinion and policy ought to be informed by accurate data and reasoned argument Using a wide range of examples from nuclear accidents and oil spills to food additives and agricultural chemicals he demonstrates why we should be as sceptical of the emotive rhetoric of environmentalists which just as often turns out to be alarmist or even false as we are of corporate spin Globally relevant but offering a unique perspective from a developing country South Africa this book is a must read for every thinking person who cares about the world we live in
