

**HS29 SERIES UNITS**

The HS29 is a residential split-system condensing unit. Condensing coil size, circuiting and air volume result in a minimum SEER rating of 10.0. The series is designed for use with an expansion valve or RFCIV system in the indoor unit. However, the HS29-651 and -060 use only the TXV system.

The HS29-141 and -012 utilizes a rotary compressor. Other HS29 units (-018, -024-2 and -211 through -653) utilize a reciprocating compressor. All compressors are hermetically sealed for trouble-free operation and long service life. Compressor components are spring-mounted within the sealed housing. The compressor is installed in the unit on resilient rubber mounts to assure quiet, vibration-free operation. A built-in protection device assures protection from excessive current and temperatures.

HS29-460 through HS29-650 models are furnished with crankcase heaters to assure proper compressor lubrication at all times. The heater is temperature-actuated and operates only when required. HS29-024-3 and HS29-030 through -060 units utilize a scroll compressor. The scroll operates like a standard compressor but it is unique in the way it compresses refrigerant.

Several models are available in sizes ranging from 1 through 5 tons.

This manual is divided into sections which discuss the major components, refrigerant system, charging procedure, maintenance and operation sequence.

All specifications in this manual are subject to change.
