Emile Zola and

the Artistry of Adaptation Kate Griffiths,2009 Filmmakers have drawn inspiration from the pages of Emile Zola from the earliest days of cinema The ever growing number of adaptations they have produced spans eras genres languages and styles In spite of the diversity of these approaches numerous critics regard them as inferior copies of a superior textual original But key novels by Zola resist this critical approach to adaptation Both at the level of characterization and in terms of their own textual inheritance they question the very possibility of origin be it personal or textual In the light of this questioning the cinematic versions created from Zola s texts merit critical re evaluation Far from being facile copies of the nineteenth century novelist s works these films assess their own status as adaptations playing with both notions of artistic creation and their own artistic act

The Darnton Debate Voltaire Foundation, 1998 Ever since Professor Robert Darnton aroused the interest of all Enlightenment scholars with the publication of *The High Enlightenment and the low life literature in pre-revolutionary France* in 1971 he has been in the forefront of debate about that period and the French Revolution which followed it His work has long been an indispensable study for all those who ponder on the nature and evolution of these great movements By the mid 1990s however it was apparent that Darnton's far reaching conclusions on the relationship of the Enlightenment to the Revolution together with his historical accounts of printed works and the mentalities of the eighteenth century merited a comprehensive debate on his whole oeuvre The present collection sparks off that debate The contributors to this volume were invited freely to address any particular aspect of Robert Darnton's researches or to discuss the whole thrust of his thinking about the past Darnton readily agreed to this proposal encouraging the editor to send invitations to long standing critics just as much as to more sympathetic readers The essays collected here respond to the original request in

diverse ways Taking up a whole spectrum of positions about Darnton s work they attempt an answer based on deep reflection or assiduous source research or both In a coda to the volume Robert Darnton responds robustly to the various readings of his work In places he seeks to rescue it from what he considers to be false interpretations and to set the record straight But his essay is not just a rebuttal It moves the debate on bringing new insights and information not previously published His conclusion are as flexible open ended as one could wish and in line with which they have been richly plumbed in his writings The threads running through the various essays are drawn together by a comprehensive index of eighteenth century persons and writings *Minutes of Proceedings and Evidence of the Standing Committee on National Defence and Veterans Affairs* Canada.
