Hook's Law Experiment

Purpose: To measure the spring constant of a spring using two different methods.

Background: If a weight $F = mg$ is hung from the end of an unknown spring, causing it to stretch a distance x from its original and unstrained form, F is related to the spring which opposes the pull of the weight. If F is not so large as to permanently distort the spring, then the force F will restore the spring to its original length after the load is removed. The magnitude of the restoring force is directly proportional to the stretch.

$$F = kx$$

The constant k is called the spring constant. Its significance lies in relation to the change in length of the spring, as in Eq. 1.

$$F = mg = kx \quad (1)$$

In this case it is apparent that if a plot of F vs. distance x from a force position, the gradient confirms that the spring follows Hooke's Law and confirms Eq. 1.

An additional aspect is possible. The difference of simple harmonic motion is that a motion under a force "obeys" Hooke's Law" restoring force from that for simple harmonic motion, the period does not depend upon the amplitude of the oscillation. For small x , we have

$$T = 2\pi \sqrt{m/k} \quad (2)$$

which gives us the spring constant. T is the period of the position and is a the time for a complete cycle. Thus, the mass includes the mass of the spring itself. However, the entire spring does not vibrate with the same amplitude as the load (the attached mass) and therefore it is necessary to measure the effective load mass in the same way, from the end of the spring plus some fraction of the mass of the spring. Based on earlier experiments, one third of the mass of the spring is a good approximation of the effective load due to the spring, that

$$m_{\text{eff}} = m + \frac{1}{3}m_s$$

where m_s is the effective load of the spring. Using this in Eq. 2, we find

$$T = 2\pi \sqrt{\frac{m + \frac{1}{3}m_s}{k}} \quad (3)$$

The effective load of the mass can be determined by a suitable value under the influence

Academic Writing, Real World Topics Michael Rectenwald, Lisa Carl, 2015-05-28 Academic Writing Real World Topics fills a void in the writing across the curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, *Academic Writing Real World Topics* introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity, and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader or from one of many resources included in each chapter's Suggested Additional Resources. Part II, Real World Topics, also refers extensively to the Guide. Thus the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content.

Discipline-Specific Writing John Flowerdew, Tracey Costley, 2016-09-13 *Discipline Specific Writing* provides an introduction and guide to the teaching of this topic for students and trainee teachers. This book highlights the importance of discipline-specific writing as a critical area of competence for students and covers both the theory and practice of teaching this crucial topic. With chapters from practitioners and researchers working across a wide range of contexts around the world, *Discipline Specific Writing* explores teaching strategies in a variety of specific areas, including science and technology, social science, and business. It discusses curriculum development, course design, and assessment, providing a framework for the reader. It analyses the teaching of language features, including grammar and vocabulary for academic writing. It demonstrates the use of genre analysis, annotated bibliographies, and corpora as tools for teaching. It provides practical suggestions for use in the classroom, questions for discussion, and additional activities with each chapter. *Discipline Specific Writing* is key reading for students taking courses in English for Specific Purposes, Applied Linguistics, TESOL, TEFL, and CELTA.
