

Your Owner's Guide To...

WHDR™ WET CHEMICAL FIRE SUPPRESSION SYSTEM

This guide helps you understand your responsibilities in fire protection. It covers system operation, maintenance and emergency procedures.

This guide is not a Design, Installation, Operation and Maintenance Manual. Only factory trained and certified companies and individuals are permitted to install and maintain the Kidde WHDR System. For all maintenance, recharge, service, or repair, contact your authorized distributor.

Caution: Installation or maintenance of your system by personnel other than those trained by the system manufacturer may result in the system failing to operate properly. Such failure could cause serious personal injury and property damage.

Request that the installer provide you with a statement which specifies the equipment provided and the appliances protected.

How Your Automatic Fire Protection System Works

As illustrated above:

- ① A fire starts...
- ② A fusible link melts.
- ③ An actuating device automatically opens the container valve, allowing the wet agent solution, to discharge through pipe and nozzles, suppressing fire through a patented process.
- ④ Gas valves and electrical switches, where installed, will operate to shut off your sources of fuel.

What You Should Do In The Event Of A Fire

1. Quickly and carefully, evacuate others from the premises.

2. If the system has not operated automatically...

...Manually activate the system. (Which type of manual operation do you have?)

3. Call the Fire & Rescue Service. Number: _____

4. Stand by with a Class F portable fire extinguisher if it is safe to do so.
