1. Comprehensive postabortion care services should include both medical and preventive healthcare. The following except one are key elements of postabortion care:

- Emergency treatment of incomplete abortion and potentially life-threatening complications
- Postabortion family planning counseling and services
- Links between postabortion emergency services and the reproductive healthcare system
- Psychological and spiritual counseling

ANSWER: D

Comprehensive postabortion care services should include both medical and preventive healthcare. The key elements of postabortion care are:

- Emergency treatment of incomplete abortion and potentially life-threatening complications
- Postabortion family planning counseling and services
- Links between postabortion emergency services and the reproductive healthcare system

Reference: Adapted from WHO

2. WHO has identified the prompt treatment of incomplete abortion as an essential element of obstetric care that should be available at every district-level hospital. Emergency treatment for postabortion complications does not include:

- Uterine evacuation to remove retained products of conception (POC)
- Provision for family planning
- An initial assessment to confirm the presence of abortion complications
- Prompt referral and transfer

ANSWER: C

Emergency treatment for postabortion complications includes:

- An initial assessment to confirm the presence of abortion complications
- Talking to the woman regarding her medical condition and the treatment plan
- Medical evaluation (brief history, limited physical and pelvic examination)
- Prompt referral and transfer if the woman requires treatment beyond the capability of the facility where she is seen
- Stabilization of emergency conditions and treatment of any complications (both complications present before treatment and complications occurring during or after the treatment procedure)
- Uterine evacuation to remove retained products of conception (POC)

Option C is done after emergency treatment.

3. A number of factors limit provision of family planning services to women who have experienced an abortion. The following except one are factors that increase a woman's risk of repeated unwanted pregnancies:

- Lack of understanding of and attention to women's reproductive health needs on the part of providers
- Lack of services for some groups of women

ANSWER: D

Because a woman seeking treatment for incomplete abortion already may have experienced an unwanted pregnancy either as the result of not using contraception or method failure, she may be in need of effective contraception.

A number of factors limit provision of family planning services to women who have experienced an abortion. These factors, which increase a woman's risk of repeated unwanted pregnancies, include:

- Lack of understanding of and attention to women's reproductive health needs on the part of providers
- Lack of services for some groups of women (e.g., adolescents, single women)
- Separation of emergency postabortion care services and family planning services
- Misinformation among providers about appropriate postabortion contraceptive methods
- Lack of acknowledgment of the problem of unsafe abortion and the resulting need for contraceptive services

4. Which of the following statements made by Nurse Hannah correctly describe the implementing rules and regulations of RA 9288?

- All communicable diseases should be reported to the nearest health station
- To acquire a marriage license, couple should receive instructions on family planning and responsible parenthood
- Newborn screening should be performed after 24 hours following delivery of the newborn
- All children below 8 years of age requires compulsory immunization against childhood immunizable diseases

ANSWER: C

Under Sec. 6 of RA 9288, Newborn screening shall be performed after twenty-four (24) hours of life but not later than three (3) days from complete delivery of the newborn. A newborn that must be placed in intensive care in order to ensure survival may be exempted from the 3-day requirement but must be tested by seven (7) days of age. A parent or legal guardian may refuse testing on the grounds of religious beliefs, but shall acknowledge in writing their understanding that refusal for testing places their newborn at risk for undiagnosed heritable conditions. The DOH shall be the lead agency in implementing this Act. Option A: RA 3573. Option B: PD 965. Option D: PD 996

Reference: RA 9288

5. A postpartum client asks the nurse, "What are the disorders tested in newborn screening?" The nurse accurately responds by stating: a. "These are Congenital Hypothyroidism, Congenital Adrenal Hyperplasia, Galactosemia, PKU, and G6PD deficiency"

Ubiquitous Music Ecologies Victor Lazzarini, Damián Keller, Nuno Otero, Luca Turchet, 2020-11-26 Ubiquitous music is an interdisciplinary area of research that lies at the intersection of music and computer science. Initially evolving from the related concept of ubiquitous computing, today ubiquitous music offers a paradigm for understanding how the everyday presence of computers has led to highly diverse music practices. As we move from desktop computers to mobile and internet-based multiplatform systems, new ways to participate in creative musical activities have radically changed the cultural and social landscape of music composition and performance. This volume explores how these new systems interact and how they may transform our musical experiences. Emerging out of the work of the Ubiquitous Music Group, an international research network established in 2007, this volume provides a snapshot of the ecologically grounded perspectives on ubiquitous music that share the concept of ecosystem as a central theme. Covering theory, software and hardware design, and applications in educational and artistic settings, each chapter features in-depth descriptions of exploratory and cutting-edge creative practices that expand our understanding of music making by means of digital and analogue technologies. **New**

Directions in Third Wave Human-Computer Interaction: Volume 2 - Methodologies Michael Filimowicz, Veronika Tzankova, 2018-06-27 This is the first extensive compilation documenting contemporary third-wave HCI, covering key methodological developments at the leading edge of human-computer interactions. Now in its second decade as a major current of HCI research, the third wave integrates insights from the humanities and social sciences to emphasize human dimensions beyond workplace efficiency or cognitive capacities. Where the earliest HCI work has been strongly based on the concept of human-machine coupling, which expanded to workplace collaboration as computers came into mainstream professional use, today HCI can connect to almost any human experience because there are new applications for every aspect of daily life. Volume 2, Methodologies, covers methodological approaches grounded in autoethnography, empathy-based design, crowdsourcing, psychometrics, user engagement, speculative design, somatics, embodied cognition, peripheral practices, and transdisciplinarity. **The Academy**, 1881 [The Athenaeum](#), 1884 **Academy and Literature** Charles Edward Cutts Birch, Appleton, Charles Edward Doble, James Sutherland Cotton, Charles Lewis Hind, William Teignmouth Shore, Alfred Bruce Douglas, Ellis Ashmead-Bartlett, Thomas William Hodgson Crosland, 1881 [Academy, with which are Incorporated Literature and the English Review](#), 1881 **The Publishers' Circular and Booksellers' Record**, 1907 [The Publisher](#), 1907 *Publishers' Circular and Booksellers' Record of British and Foreign Literature*, 1907 **The Gardener's Magazine**, 1908 [The Literary World](#), 1882 **Christian Companion**, 1900 **Spirit of the Times and the New York Sportsman**, 1865 **Outlook** Alfred Emanuel Smith, Francis Walton, 1882 *Harpers Wine & Spirit Directory*, 2006 [Guide to Microforms in Print](#), 2002 **Whitaker's Cumulative Book List**, 1982 [Index Veterinarius](#), 2005 *The Christian Union*, 1882 **The Library of Congress Author Catalog** Library of Congress, 1953
