Liability and Environment Lucas Bergkamp, 2021-12-06 Liability and Environment analyzes the role of law in particular civil liability in controlling environmental pollution and risk In modern environmental policy liability has become a popular instrument In this book Prof Bergkamp takes a fresh look at civil liability for environmental harm in an inter and transnational context Over the last decade industry s liability exposure for environmental harm has expanded significantly At the international EC and national level proposals for onerous strict environmental liability regimes are pending The polluter pays principle which is an articulation of the cost internalization theory in the environmental area is believed to justify such liability regimes Applying an instrumental approach to legal instruments Prof Bergkamp aims to redefine the role of liability in the heavily regulated environmental area He shows that liability for environmental harm is not justified by the polluter pays principle is an uncertain and unreliable instrument for achieving prevention results in an inefficient insurance scheme and plays a dubious role in adjusting activity levels Based on an analysis of the basic characteristics of alternative legal instruments Prof Bergkamp concludes that civil liability should play a more modest limited role in an environmental law system dominated by public law Where deterrence is not the objective first party insurance compensation funds or other public law regimes should be preferred over liability rules In addition to civil liability of private

parties Liability and Environment discusses State liability under international EC and national law Under international law breach of a primary obligation triggers a State s liability Prof Bergkamp argues that this rule should be applied also to liability of private parties In the environmental area a business primary obligations are spelled out in detailed permit conditions regulations and statutes According to Prof Bergkamp only if a primary obligation is breached a private person should be liable for environmental harm The system that Bergkamp advocates is an objective fault liability regime in which public environmental law defines the standard of care for both government and industry In rebuilding our civil liability system we should keep in mind that what is good for industry should be good for everyone or it is not good for anyone we should keep in mind that what is good for private parties should be good for the state or it is not good for either In rebuilding our civil liability system the international law of State responsibility which is unpolluted by risk spreading and activity level considerations will guide us a long way This book is aimed at advanced law students academic scholars and practitioners In addition it will be of interest to policy and legislative analysts legislators and government officials Professor Bergkamp s book cannot be described as solving the problems of legal and regulatory control of environmental harm whether within a nation or internationally As suggested before however the very idea of a solution is illusory All legal and regulatory regimes around the world are today and will remain for the future in a state of perpetually continuing development The virtue of this fine book is that it moves the process of that development forward by a very substantial measure from the Foreword by George L.
