

FiTech Fuel Injection

Warning: These kits are not legal for use on pollution controlled vehicles.

Instruction Manual

for the following Go EFI Systems:

30000 - Go Street EFI System

This Quick Start Manual is designed to get you up and running with the Go Street Kit and either the 30000 Fuel Command Center or the 30000 Inline Fuel Delivery Kit. The FiTech Go EFI System is the industry's most advanced throttle body EFI system and also the easiest to install. It includes a very advanced manifold Computer but is also capable of being far more flexible than any

competitive product that utilizes a manifold Computer. Please read the full instruction manual before beginning your installation.

These instructions cover the basic kit installation and setup as well as general instructions for both of the optional Fuel Delivery Kits. For technical assistance with your Go EFI System, call 951-345-2524.

Warning: Caution must be observed when installing any product involving fuel system parts or gas lines. Modifications should be a well-ventilated area with an approved fire extinguisher readily available. Fuel hoses and other parts exposed should be painted to protect against debris and sprayed periodically.

Use the recommended fueling rate installation performed by an experienced qualified automotive technician. The fueling rate installation must be thoroughly checked for any fuel system leaks. All safety precautions must be observed when working with fuel. **Note:** Do not use white gas (jetting wine).

About your FiTech Go EFI System

The FiTech Go EFI System will bolt directly to any 4-800, intake manifold. To fit on a carburetor bore 4-800, manifold will require an intermediate adapter plate to permit bolting. Note that the FiTech throttle body will bolt directly to a carburetor bore 4-800, manifold but may leak without the

adapter plate. Suitable adapter plates are available from several suppliers such as Summit Racing (304M-01-620).

The FiTech Go EFI System's full tuning mode (the single initial setup) is performed using the Manifold Computer. When the necessary initial inputs are made with the FiTech
