**United States Army Combat Forces Journal**, 1964 *Nuclear Weapons and International Law: Existential Risks of Nuclear War and Deterrence through a Legal Lens* Charles J. Moxley Jr., 2024-05-15 This two volume book provides a comprehensive analysis of the lawfulness of the use of nuclear weapons based on existing international law

established facts as to nuclear weapons and their effects and nuclear weapons policies and plans of the United States Based on detailed analysis of the facts and law Professor Moxley shows that the United States arguments that uses of nuclear weapons including low yield nuclear weapons could be lawful do not withstand analysis Moxley opens by examining established rules of international law governing the use of nuclear weapons first analyzing this body of law based on the United States own statements of the matter and then extending the analysis to include requirements of international law that the United States overlooks in its assessment of the lawfulness of potential nuclear weapons uses He then develops in detail the known facts as to nuclear weapons and their consequences and U S policies and plans concerning such matters He describes the risks of deterrence and the existential nature of the effects of nuclear war on human life and civilization He proceeds to pull it all together applying the law to the facts and demonstrating that known nuclear weapons effects cannot comply with such legal requirements as those of distinction proportionality necessity precaution the corollary requirement of controllability and the law of reprisal Moxley shows that when the United States goes to apply international law to potential nuclear weapons uses it distorts the law as it has itself articulated it overlooks law in such areas as causation risk analysis mens rea and per se rules and disregards known risks as to nuclear weapons effects including radioactive fallout nuclear winter electromagnetic pulses and potential escalation He then shows that the policy of deterrence is unlawful because the use of such weapons would be unlawful Moxley urges that the United States and other nuclear weapons States take heed of the requirements of international law as to nuclear weapons threat and use He argues that law can be a positive force in society s addressing existential risks posed by nuclear weapons and the policy of nuclear deterrence

everyone Ideas, Concepts, Doctrine: 1961-1984 Robert Frank Futrell, 1989 In this first of a two volume study Dr Futrell presents a chronological survey of the development of Air Force doctrine and thinking from the beginnings of powered flight to the onset of the space age He outlines the struggle of early aviation enthusiasts to gain acceptance of the airplane as a weapon and win combat arm status for the Army Air Service later the Army Air Corps and Army Air Force He surveys the development of airpower doctrine during the 1930s and World War II and outlines the emergence of the autonomous US Air Force in the postwar period Futrell brings this first volume to a close with discussions of the changes in Air Force thinking and doctrine necessitated by the emergence of the intercontinental missile the beginnings of space exploration and weapon systems and the growing threat of limited conflicts resulting from the Communist challenge of wars of liberation In volume two the author traces the new directions that Air Force strategy policies and thinking took during the Kennedy administration the Vietnam War and the post Vietnam period Futrell outlines how the Air Force struggled with President Kennedy's redefinition of national security policy and Robert S McNamara's managerial style as secretary of defense He describes how the Air Force argued that airpower should be used during the war in Southeast Asia He chronicles the evolution of doctrine and organization regarding strategic tactical and airlift capabilities and the impact that the aerospace environment and technology had on Air Force thinking and doctrine Nuclear Weapons and International Law in the Post Cold War World Charles J. **Ideas, Concepts, Doctrine** Robert Frank Futrell, 1971 **The Police Chief**, 1993-07 Strategic Impasse Stephen J. Cimbala, 1989-08-23 There is probably no area of more crucial concern nor one more subject to possible misunderstanding and riddled with paradox than nuclear weapons and their use not only in war but as deterrents to war In Strategic Impasse Cimbala examines the critical issues problems and paradoxes inherent in the current nuclear situation It is from a fundamental contradiction the usefulness of nuclear weapons versus the undesirability of nuclear war that nuclear deadlock arises Their usefulness as deterrents is based on their destructive potential and the balance of power in Europe cannot be adjusted until the inflexible bipolar balance of terror is addressed Ironically superpower sovereignty in nuclear first strike retaliation capability shared across the divided East West political buffer zone created the impetus for improvements in conventional warfare To the extent war can be contained below the nuclear threshold conventional weaponry contributes to

deterrence by denial One difficulty lies in the improbability of completely isolating the nuclear from the conventional battlefield in a European scenario Also a level of superpower force perceived to be adequate in peacetime might prove to be an inadequate intrawar deterrent Because of the underdevelopment of conceptual frameworks credible deterrence the creation of nuclear campaigns designed to prevent war remains conjectural Highly usable weapons require a command system that can provide for simultaneous fighting and escalation but escalation beyond a certain level conflicts with control and therefore usability In turn low expectations of weapon usability may weaken deterrence In Gorbachev s defensive sufficiency forces for aggression and surprise attack would be diminished while forces for defense would be strengthened The problem lies not only in differentiating between offensive and defensive weaponry but in achieving a consensus on such a definition by NATO s member countries The book is divided into three parts the first section Issues of Theory and Strategy scrutinizes the relationship between offense and defense and examines SDI and more inclusive strategic defense matters It also questions the connection between policy objectives and force and explores the complication of externalities such as relations with allies In section two Stretching Deterrence Cimbala reviews the operational art likely to be employed by the Soviets in a conventionally fought European war and defines and appraises the sensor cyber revolution in technology and its impacts on preferred strategies The final part Beyond Deterrence considers war termination scenarios and related issues including sociopolitical aspects surveys the part nuclear weapons play in superpower competition in the Third World and explains how issues of sovereignty effect deterrence avoidance and future super power relations Strategic Impasse will enable scholars and students of military affairs as well as political scientists and government officials to see beyond current nuclear rhetoric and to make informed judgments on an issue that fundamentally affects this nation s and the world s future
