

HOW TO MAKE COFFEE

with an

Espresso Machine

Use Good Water

Fill up your water reservoir. The best is spring water, but distilled water works too.

Power On

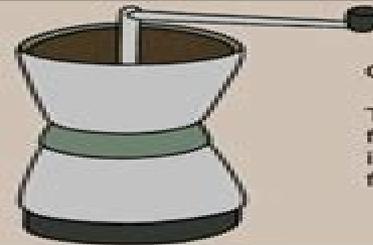

Turn on the espresso machine and ensure the boiler is hot.

The light on your machine will indicate when the machine is ready.

Dose Coffee

Use 14-18 grams of coffee beans for an espresso double. Use 7-9 grams for a solo. You can still use volumetric dosing, by weighing the scoops.

Grind Coffee

Grind your coffee finely.

The grind size is smaller than for drip coffee. The grind size is comparable to table salt, for a comparison.

Fill Portafilter

Dump your coffee grounds in the portafilter, aiming to distribute them evenly in the filter basket.

Lightly tap the portafilter to achieve perfect distribution.

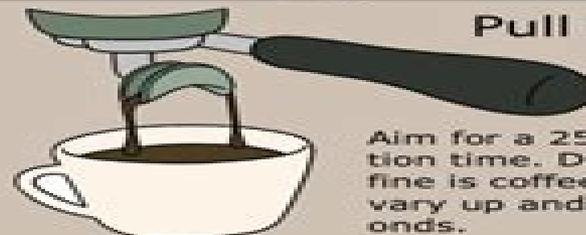

Tamp It

Give it a good tamp, aim for about 30 pounds of pressure.

Start Brewing

Lock the portafilter onto the brew head of your machine and press the brew button.

Pull the Shot

Aim for a 25 seconds extraction time. Depending on how fine is coffee ground, this can vary up and down by 5 seconds.

Espresso Making Guide:

Guide to Gourmet Coffee and Coffee Making Cara Batema, 2012-03-14 ABOUT THE BOOK As the world's most used and abused substance coffee is a drink most people have indulged in. In fact for many people drinking coffee is a daily ritual quite often we do not stop to think about what we are drinking. While you might not wish to rise to the level of coffee snob you might be curious to know more about the gourmet coffee you drink how to find the best gourmet coffee brew and taste the perfect cup or even how to roast your own beans. While almost anyone recognizes roasted beans very few people know where they come from or what processes go into creating them. Coffee comes from a coffee tree cherries grow on the tree's branches and each cherry holds two beans. You might have noticed the words arabica or robusta on a bag of coffee these words refer to the type of tree from which the beans come. From the tree the berries are harvested and dried. Any defective beans are removed. Certain types of beans like peaberry beans are viewed as defects but are also harvested for particular styles of coffee. MEET THE AUTHOR Cara Batema holds a Bachelor's degree in music and creative writing. Cara composes scores and performs for films in addition to writing and editing children's novels and other publications. Cara loves food wine fashion bike riding and other general artsy diversions. Kaldi a goat herder discovered that he would feed certain berries to his goats and they became restless and would not sleep. Kaldi brought the berries to a local monastery and the monks made a drink from the berries that allowed them to stay awake for long hours of prayer. The power of the berries spread towards the East and finally around the globe. Even today's coffee is traced back to the original coffee trees from the Ethiopian highland region. As early as the fifteenth century coffee was grown in Arabia and by the sixteenth century they were trading with nearby areas such as Egypt Turkey Syria and Persia. Coffee was consumed in homes and coffee houses alike. These cafes were much like they are today they served as the locale for public events social gatherings and live music performances. Since Muslims did not drink alcohol coffee was known as wine of the Arabs. Word of coffee spread to Europe by the seventeenth century. Critics called it the bitter invention of Satan but Pope Clement VIII gave it the papal seal of approval after trying it. Coffee houses in England Germany Austria Holland and France held a similar significance as those in Arabia and by the mid 1600s the love of coffee was brought to America.
