Assessing English Language Learners in the Content Areas Florin Mihai,2010-06-11 *Assessing English Language Learners in the Content Areas* A Research into Practice Guide for Educators seeks to provide guidance to classroom teachers staff developers and test item designers who want to improve ELL

assessment outcomes particularly in the areas of math science and social studies The first two chapters of the book establish the background for the discussion of content area assessment for ELLs examining several important characteristics of this rapidly growing student population as well as critical legislation affecting ELLs and providing a description of various forms of assessment including how ELL assessment is different from the assessment of English proficient students Important assessment principles that educators should use in their evaluation of tests or other forms of measurement are provided Other chapters review ELL test accommodations nationwide because surprisingly most teachers do not know what they can and cannot allow and the research on the effectiveness of these types of accommodations The book analyzes the characteristics of alternative assessment it discusses three popular alternative assessment instruments performance assessment curriculum based measurement and portfolios and makes recommendations as to how to increase the validity reliability and practicality of alternative assessments The book proposes fundamental assessment practices to help content area teachers in their evaluation of their ELL progress

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett,2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists It begins by defining what is meant by assessment outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment Methods of data collection e g observation interview standardised testing and sources e g self report proxy for collecting information about clients are then reviewed and the main purposes of assessment e g descriptive evaluative predictive discriminative presented The book then addresses the topics of standardisation levels of measurement reliability validity and clinical utility There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement The concept of clinical reasoning and reflective practice is then explored Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed
