## The Amazing Water Cycle Reading Worksheet

Earthwater: How the water cycle works. The water cycle is a process by which water changes from liquid to gas and back to liquid. The water cycle is a process by which water changes from liquid to gas and back to liquid.

Water is all around us, and it is constantly moving in a process called the water cycle. The water cycle is a process by which water changes from liquid to gas and back to liquid. The water cycle is a process by which water changes from liquid to gas and back to liquid.

When the sun heats up the water, some of it turns into a gas called water vapor. This process is known as evaporation. The water vapor then rises up into the atmosphere, where it can be in the form of water vapor. The water droplets in the clouds are small enough to stay in the air, depending on air temperature.

As the water vapor rises higher in the atmosphere, it gets colder. The cold air causes the water vapor to turn back into the water droplets in the clouds. This process is called condensation.
