Valuing Plastic Julie Raynaud, 2014. The objective of this report is to help companies manage the opportunities and risks associated with plastic use. It articulates the business case for companies to improve their measurement, disclosure, and management of plastic use in their designs, operations, and supply chains. In order to provide a sense of scale, the report sets out to quantify the physical impacts of plastic use translated into monetary terms. This metric can be seen as the current value at risk to a company should these external impacts be realised internally through mechanisms like strengthened regulation, loss of market share, or increased price of raw materials and energy. This metric can also be used to help understand the magnitude of the opportunities and the tangible benefits to stakeholders including shareholders of using plastic in an environmentally sustainable way.

Perverse Psychology Jem Tosh, 2014-07-25. Psychology defines people who take pleasure in the suffering of others as having a form of mental illness, while media representations frame such behaviour as evil. This is hotly contested territory, not least where sexual violence is concerned, violence which feminist voices argue is related to power rather than sex. *Perverse Psychology* examines psychiatric constructions of sexual violence and transgender people from the 19th century until the latest DSM 5 diagnoses. It uses discourse analysis to interrogate the discursive boundaries between normal and abnormal rape, as well as the pathologization of gender and sexual diversity. The book illuminates for the first time the parallels between psychiatry's construction of gender diversity and sexual violence, and leads us to question whether it is violence that the profession finds so intriguing, or the gender nonconformity it represents. *Perverse Psychology* is ideal reading for postgraduate students and researchers in the fields of critical psychology, discourse analysis, feminism, transgender people, LGBT psychology, and the history of psychiatry.
