International Development Corinna R. Unger, 2018-09-06 International Development A Postwar History offers the first concise historical overview of international development policies and practices in the 20th century Embracing a longue dur e perspective the book describes the emergence of the development field at the intersection of late colonialism the Second World War the onset of decolonization and the Cold War It discusses the role of international organizations colonial administrations national governments and transnational actors in the making of the field and it analyzes how the political intellectual and economic changes over the course of the postwar period affected the understanding of and expectations toward development By drawing on examples of development projects in different parts of the world and in different fields Corinna R Unger shows how the plurality of development experiences shaped the notion of development as we know it today This book is ideal for scholars seeking to understand the history of development assistance and to gain new insight into the international history of the 20th century

Culture and the Development of Children's Action Jaan Valsiner, 1997-06-23 In this deeply probing intellectually challenging work Dr Jaan Valsiner lays the groundwork for a dynamic new cultural historical approach to developmental psychology He begins by deconstructing traditional developmental theory exposing the conceptual confusion and epistemological blind spots that he believes continue to undermine the scientific validity of its methodologies He describes the ways in which embedded cultural biases shape interventional goals and influence both the direction research takes and the ways in which research data are interpreted And he suggests ways in which researchers and clinicians can become more aware of and transcend those biases Dr Valsiner then develops a hierarchical systemic model that portrays development as an open ended dialectical process Central to Valsiner's approach is the premise that since each child is unique as are his or her life conditions deviations in function or the rate of development from a prescribed norm are just as likely to be constructive adaptations to changing environmental pressures as symptoms of psychological disorder Drawing upon sources as varied as linguistic philosophy structural anthropology thermodynamics and systems theory as well as the work of many of the leading figures in twentieth century developmental theory Valsiner argues convincingly for an approach to developmental psychology mature enough to recognize the difference between healthy variability and dysfunction In later chapters the focus shifts from development in the abstract to the everyday challenges encountered by the developing child Case histories illustrate the subtle interplay of cultural physiological and psychological factors in shaping childhood behavior Called an intellectual tour de force by the Bulletin of the Menninger Clinic Culture and the Development of Children's Action is important reading for developmental psychologists child psychologists and all child clinicians Of course no science progresses in a linear fashion It moves interdependently with the society in which it is embedded making use of the narrative forms in describing itself to its insiders and outsiders The rhetoric of scientists about their science is therefore necessarily inconsistent Sciences are both social institutions within a society and social organizations that attempt to build

universal knowledge It is a complicated task for psychology to be both knowledge constructing and self reflexive at the same time Nevertheless it is the latter kind of reflexivity that guides the actual construction of knowledge Jaan Valsiner This book is a fascinating and important work that challenges much of contemporary developmental psychology The Second Edition has changed in a number of respects and much new material has been added but at root Valsiner grapples with the question how shall we understand development He continues to struggle also with what he describes rather vividly as the epistemological windmills of psychology His challenge is summed up succinctly in two lines from a poem by T S Eliot Where is the wisdom we have lost in knowledge Where is the knowledge we have lost in information from the Foreword by Kevin Connolly
