

FX40 Supervisory Controller

The FX40 brings a new generation of Web-based technology into the Facility Explorer product family. The FX40 manages a network of field controllers using standard communication protocols. It also supports a full set of building automation features and functions specifically designed for commercial facilities, including event scheduling, alarm management, histories, and totalization.

The FX40 can support up to 100 field controllers using any combination of BACnet, LonWorks®, and BACnet/IP protocols. The FX40 also provides onboard, hardwired input and output points for direct monitoring of equipment status or analog sensors and control of auxiliary devices or alarms.

The FX40 provides a user interface and configuration tool that users can access with a Web browser. Multiple users can concurrently connect to the FX40. Security and presentation preferences are managed through user profiles, login IDs, and passwords. Remote access is easily achieved from an Internet, intranet, or a dial-up connection.
