Journal Peer Review Guidelines:

Editorial Peer Review Ann C. Weller, 2001 This book is the first to provide an in depth analysis of the peer review process in scholarly publishing Author Weller offers a systematic review of published studies of editorial peer review in the following broad categories general studies of rejection rates studies of editors studies of authors and studies of reviewers The book concludes with an examination of new models of editorial peer review intended to enhance the scientific communication process as it moves from a print to an electronic environment *Peer review in scientific publications* Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-07-28 This report indicates that the oversight of research integrity in the UK is unsatisfactory The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments researchers should aim for the gold standard of making their data fully disclosed and made publicly available The report examines the current peer review system as used in scientific publications and the related issues of research impact data management publication ethics and research integrity The UK does not seem to have an oversight body for research integrity covering advice and assurance functions across all disciplines and the Committee recommends the creation of an external regulator It also says all UK research institutions should have a specific member of staff leading on research integrity The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles Innovative ways to improve current pre publication peer review practices are highlighted in the report including the use of pre print servers open peer review increased transparency and online repository style journals The growth of post publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools which the Committee encourages There should also be greater recognition of the work sometimes considered to be a burden carried out by reviewers by both publishers and employers In order to do this publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review *Unveiling the World of Open Journal Systems: Empowering Academic Publishing* Prof. Dr Balasubramanian Thiagarajan, 2023-09-20 In the ever evolving landscape of academic publishing Open Journal Systems OJS stands as a beacon of empowerment ushering in a new era of scholarly communication This book *Unveiling the World of Open Journal Systems Empowering Academic Publishing* is a journey through the heart of this transformative platform In the corridors of academia the need for accessible efficient and sustainable publishing solutions has never been more pronounced OJS an open source software designed to facilitate the creation and management of scholarly journals has emerged as a powerful tool in the hands of editors authors reviewers and readers alike Its philosophy of openness transparency and collaboration has redefined how knowledge is disseminated and accessed As the pages of this book unfold we embark on a quest to unravel the intricate web of OJS exploring its history functionality and the myriad possibilities it offers to academic publishers With each chapter we delve deeper into the mechanics of OJS from installation and configuration to customization

How to Write a Book Review. Book Review Guide Udeme Usanga, 2023-09-04 Document from the year 2012 in the subject Guidebooks School Education Pedagogy Michael Okpara University of Agriculture NRCRI Federal College of Agriculture Ishiagu Ebonyi State Nigeria course Book Science language English abstract The main purposes of research include understanding, integrating, and modeling nature and society. Books and research works are important to achieve such goals since they review fundamental subjects in different fields of human endeavour while incorporating more recent developments. Materials published from academic research findings and other literary works need to be published for use to increase knowledge in the subject area by participants in the development process. However, since no one person is a repository or island of knowledge, such works need to be assessed, evaluated, and appraised to meet the needs of the target audience. This study, which evaluated the state of book review at the Federal College of Agriculture's Library Ishiagu, revealed that Nigerian authors do not write and publish their work like their foreign counterparts. Out of the total number of 4,500 books in the library, 77.78% are reviewed, while 22.22% are not reviewed. 82.22% of books in the library are written and published by foreigners, while Nigerians and other African authors

contributed to the remaining 17.78% meaning that Nigerian authors and researchers are not doing enough in their literary and research work as it applies to the Nigerian situation.
