TO INVESTIGATE THE PROCESS OF MEIOSIS

Organisms produced by sexual reproduction are truly new organisms. They have different sets of genes from their parents. The gametes formed by meiosis are just for the purpose of sexual reproduction. Gametes cannot grow into another organism until they fuse with another gamete to form a zygote. When the zygote forms, it is genetically unique.

Genetic variation allows a species to have a better chance of adapting to and surviving sudden changes in the environment. No two individuals in a sexually reproducing population are exactly the same. Meiosis during sexual reproduction therefore ensures maximum genetic variation and improved the chances of a species' survival.

Employees must always be prepared for current challenges and tasks as well as for changes in working methods e.g. increasing project work. This is the mission of further education. In addition to current knowledge, soft skills must also be taught. This task requires a clear goal orientation and a demand-oriented allocation of activities. Otherwise, there is a risk of waste of resources, inefficiency, and overstrain. Non-application of knowledge is ineffective.

University of Siegen. language: English. abstract: In this thesis, the author scrutinizes the advantages of using graphic novels in teaching English as a foreign language and tries to answer the following research question: In how far does reading and working with graphic novels improve the linguistic and cultural competence of German students in English as a foreign language (EFL)? This thesis consists of two parts: a theoretical part that will acquaint the reader with the notion of visual literacy, some basics on comic style theory, the development of intercultural communicative competence, and second language acquisition. In the second part, the author looks at two research projects dealing with the integration of graphic novels in ELT at a German grammar school. The first project is conducted in an eighth grade and investigates students' linguistic development through reading graphic novels and both students' and the teacher's appreciation of graphic novels. The second research project is conducted in an eleventh grade and investigates students' development of intercultural communicative competence and both the students' and teacher's enthusiasm towards using graphic novels in language teaching. At the end, the author will answer the research question in the form of a conclusion.

Transnational Narcotics Trafficking across Vietnam Borderland and Lao People's Democratic Republic Hai Thanh Luong, 2017-06-21. Doctoral Thesis. Dissertation from the year 2017 in the subject Law. Criminal process. Criminology. Law Enforcement. grade A. language: English. abstract: Close proximity to the major production zones, porous borderlands, mountainous frontiers, and long coastlines offer advantageous conditions for trafficking narcotics. The illicit drug situation has become much more complex in Vietnam with the growth in amphetamine-type stimulants production and trade. Even so, empirical research and analysis of the organization and operation of transnational

narcotics trafficking TransNT remains limited The purpose of this thesis is to present the first detailed inquiry into the nature of TransNT across the border between Lao People s Democratic Republic PDR and Vietnam using an exploratory approach which draws upon qualitative and quantitative methods In particular the thesis presents findings from case studies of cross border trafficking between Vietnam and Lao PDR in the period of 2003 2013 combined with interview and survey data from criminal investigation police and drug related crimes officers CIPDRC from six border provinces who are directly and indirectly involved in investigating these cases The findings of this study indicate that drug markets in Vietnam are not controlled by monopolistic hierarchical organizations or cartels The structures of TransNT entities operating across the Lao Vietnam border are small based on family ties and fellow countrymen relations are fluid and loosely organized They are very adaptable and sophisticated with diverse modus operandi and multiple divisions of labour This presents particular challenges to law enforcement agencies LAEs This thesis questions to capacity of Vietnam s police to enforce the government s zero tolerance anti narcotics policy The study highlights practical problems and specific barriers in combating TransNT LEAs in Vietnam and Lao PDR operate without effective mechanisms to cooperate and share information It is also the case that traffickers often have more sophisticated equipment at their disposal to help them avoid arrest Police forces work within national structures and yet are faced with the task of combatting transnational crime This reality affects law enforcement capacity at a national as well as regional level but Association of the Southeast Asian Nations member states have yet to establish effective structures for dealing with this non traditional security challenge Based on these findings therefore the thesis proposes recommendations to enhancing the effectiveness of LEAs to combat TransNT between Vietnam and Lao PDR
