Meeting the Challenges to Measurement in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license

Evolution Education Around the Globe Hasan Deniz,Lisa A. Borgerding,2018-06-21 This edited book provides a global view on evolution education It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe Western Europe North Africa South Africa North America South America Middle East Far East South East Asia Australia and New Zealand Studies in evolution education literature can be divided into three main categories a understanding the interrelationships among cognitive affective epistemological and religious factors that are related to peoples views about evolution b designing implementing evaluating evolution education curriculum that reflects contemporary evolution

understanding and reducing antievolutionary attitudes This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region The individual chapters thus include common elements that facilitate a cross cultural meta analysis Written for a primarily academic audience this book provides a much needed common background for future evolution education research across the globe *Climate Change Education in Formal Settings, K-14* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Steering Committee on Climate Change Education in Formal Settings, K-14, 2012-11-02 Climate change is occurring is very likely caused by human activities and poses significant risks for a broad range of human and natural systems Each additional ton of greenhouse gases emitted commits us to further change and greater risks In the judgment of the Committee on America's Climate Choices the environmental economic and humanitarian risks of climate change indicate a pressing need for substantial action to limit the magnitude of climate change and to prepare to adapt to its impacts A principal message from the recent National Research Council report America's Climate Choices this brief summary of how climate change will shape many aspects of life in the foreseeable future emphasizes the vital importance of preparation for these changes The report points to the importance of formal and informal education in supporting the public's understanding of those challenges climate change will bring and in preparing current and future generations to act to limit the magnitude of climate change and respond to those challenges Recognizing both the urgency and the difficulty of climate change education the National Research Council with support from the National Science Foundation formed the Climate Change Education Roundtable The roundtable brings together federal agency representatives with diverse experts and practitioners in the physical and natural sciences social sciences learning sciences environmental education education policy extension education and outreach resource management and public policy to engage in discussion and explore educational strategies for addressing climate change Two workshops were held to survey the landscape of climate change education The first explored the goals for climate change education for various target audiences The second workshop which is the focus of this summary was held on August 31 and September 1 2011 and focused on the teaching and learning of climate change and climate science in formal education settings from kindergarten through the first two years of college K 14 This workshop based on an already articulated need to teach climate change education provided a forum for discussion of the evidence from research and practice The goal of this workshop was to raise and explore complex questions around climate change education and to address the current status of climate change education in grade K 14 of the formal education system by facilitating discussion between expert researchers and practitioners in complementary fields such as education policy teacher professional development learning and cognitive science K 12 and higher education administration instructional design curriculum development and climate science *Climate Change Education in Formal Settings K 14 A Workshop Summary* summarizes the two workshops **Circular** ,1965 **School Life** ,1922 *Readers' Guide to Periodical Literature* ,1920

Enhancing the Effectiveness of Team Science National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Team Science, 2015-07-15 The past half century has witnessed a dramatic increase in the scale and complexity of scientific research The growing scale of science has been accompanied by a shift toward collaborative research referred to as team science Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators but the challenges of collaboration can slow these teams progress in achieving their scientific goals How does a team based approach work and how can universities and research institutions support teams Enhancing the Effectiveness of Team Science synthesizes and integrates the available research to provide guidance on assembling the science team leadership education and professional development for science teams and groups It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals This report offers major public policy recommendations for science research agencies and policymakers as well as recommendations for individual scientists disciplinary associations and research universities Enhancing the Effectiveness of Team Science will be of interest to university research administrators team science leaders science faculty and graduate and postdoctoral students HUD-space-science-veterans Appropriations for 1975 United States.
