Cognition, Metacognition, and Culture in STEM Education Yehudit Judy Dori,Zemira R. Mevarech,Dale R. Baker,2017-12-01 This book addresses the point of intersection between cognition metacognition and culture in learning and teaching Science Technology Engineering and Mathematics STEM We explore theoretical background and cutting edge research about how various forms of cognitive and metacognitive instruction may enhance learning and thinking in STEM classrooms from K 12 to university and in different cultures and countries Over the past several years STEM education research has witnessed rapid growth attracting considerable interest among scholars and educators The book provides an updated collection of studies about cognition metacognition and culture in the four STEM domains The field of research cognition and metacognition in STEM education still suffers from ambiguity in meanings of key concepts that various researchers use This book is organized according to a unique manner Each chapter features one of the four STEM domains and one of the three themes cognition metacognition and culture and defines key concepts This matrix type organization opens a new path to knowledge in STEM education and facilitates its understanding The discussion at the end of the book integrates these definitions for analyzing and mapping the STEM education research Chapter 4 is available open access under a Creative Commons Attribution 4 0 International License via link springer.com

Beyond Age Effects in Instructional L2 Learning Simone E. Pfenninger,David Singleton,2017-04-21 This book constitutes a holistic study of how

and why late starters surpass early starters in comparable instructional settings Combining advanced quantitative methods with individual level qualitative data it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school thereby offering a long term view of the teenage experience of foreign language learning The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly Taking account of contextual factors individual socio affective factors and instructional factors within a single longitudinal study the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition but that in this context for a number of reasons a later onset can be beneficial

Asia's Latent Nuclear Powers Mark Fitzpatrick,2017-10-03 If the nuclear weapons club were to further expand would Americas democratic allies in Northeast Asia be among the next entrants Japan South Korea and Taiwan all have robust civilian nuclear energy programmes that make them virtual nuclear powers according to many analysts All three once pursued nuclear weapons and all face growing security threats from nuclear armed adversaries But will they or rather under what circumstances might they This book analyses these past nuclear pursuits and current proliferation drivers In explaining the nuclear technology that the three now possess it considers how long it would take each to build a nuclear weapon if such a fateful decision were made Although nuclear dominoes Northeast Asia cannot be ruled out the author does not predict such a scenario Unlike when each previously went down a nuclear path democracy and a free press now prevail as barriers to building nukes in the basement Reliance on US defence commitments is a better security alternative as long as such guarantees remain credible an issue that is also assessed But extended deterrence is not a tight barrier to proliferation of sensitive nuclear technologies Nuclear hedging by its Northeast Asian partners will challenge Washingtons nuclear diplomacy
