**Mastering Search Analytics** Brent Chaters, 2011-10-07 Many companies still approach Search Engine Optimization SEO and paid search as separate initiatives This in depth guide shows you how to use these programs as part of a comprehensive strategy not just to improve your site s search rankings but to attract the right people and increase your conversion rate Learn how to measure test analyze and interpret all of your search data with a wide array of analytic tools Gain the knowledge you need to determine the strategy s return on investment Ideal for search specialists webmasters and search marketing managers Mastering Search Analytics shows you how to gain better traffic and more revenue through your search efforts Focus on conversion and usability not on driving larger volumes of traffic Track the performance of your SEO and paid search keywords Apply techniques to monitor what your competitors are doing Understand the differences between mobile and desktop search Learn how social media impacts your search rankings and results Audit your site for problems that can affect users and search spiders Create dashboards and expanded reports for all of your search activities

*iNetSec 2009 - Open Research Problems in Network Security* Jan Camenisch, Dogan Kesdogan, 2009-11-02 The working group WG 11 4 of IFIP ran an iNetSec conference a few times in the past sometimes together with IFIP security conference sometimes as a stand alone workshop with a program selected from peer reviewed submissions When we were elected to chair WG 11 4 we asked ourselves whether the security and also the computer science community at large bene ts from this workshop In particular as there are many too many security conferences it has become difficult to keep up with the eld After having talked to many colleagues far too many to list all of them here we decided to try a different kind of workshop one where people would attend to discuss open research topics in our eld as typically only happens during the coffee breaks of ordinary conferences To enable this we called for abstracts of 2 pages where the authors outline the open

problems that they would like to discuss at the workshop the intent being that the author would be given 15 minutes to present the topic and another 15 minutes for discussion These abstracts were then read by all members of the Program Committee and ranked by them according to whether they thought this would lead to an interesting talk and discussion We then simply selected the abstracts that got the best rankings We were happy to see this result in many really interesting talks and discussions in the course of the workshop Of course these lively and direct discussions are almost impossible to achieve in a printed text Still we asked the authors to distill the essence of these discussions into full papers The results are in your hands
