mechanics is an active research area with deep theoretical and numerical roots The links between nonsmooth analysis and
optimization with mechanics have been investigated intensively during the last decades especially in Europe The study of
complementarity problems variational quasivariational and hemivariational inequalities arising in contact mechanics and
beyond is a hot topic for interdisciplinary research and cooperation The needs of industry for robust solution algorithms
suitable for large scale applications and the regular updates of the respective elements in major commercial computational
mechanics codes demonstrate that this interaction is not restricted to the academic environment The contributions of this
