COURSE DESCRIPTION: Integrated Mathematics Course 3 is a combination of traditional Geometry and Algebra II material with an emphasis on real-world applications. In this class, there will be several hands-on activities and projects in addition to the everyday group collaboration. The topics that will be covered are:

- Reasoning and Logic
- Angle and Line Relationships
- Similarity and Congruence
- Quadrilaterals
- Surface Area and Volume
- Circles
- Inequalities
- Systems of Equations
- Functions (Quadratic, Exponential, Logarithmic, Polynomial, Rational, Inverse)

ASSESSMENT: Students will not be given formal homework assignments on a regular basis. However, there will always be something for them to do at home! Most of the time, they will need to finish assignments that were not completed in class. I always have additional practice problems available, and will assign them for homework as needed.

Students will be able to work at their own pace, which means that some students may be working on different units than others at any given time. The standard assignments for each unit are guided notes, practice problems/applications, quizzes/tests, and projects (for most units). Students are allowed to retake quizzes as many times as they want until they pass and/or achieve their desired grade. I allow corrections on tests, but only 50% of the points that are corrected will be added to the original score. In averaging grades, all assignments are weighted as follows:

- Classroom Participation (10%)
- Homework (10%)
- Quizzes (35%)
- Tests (20%)
- Projects (25%)
