Chinese Law: Context and Transformation Jianfu Chen, 2015-12-04 China has changed and the continuing changes have not just been about economic development. Among the many transformations there has been another quiet, peaceful and largely successful but far from perfect revolution in the area of law whose deficiencies have been more often mercilessly examined and documented than have its historical achievements and significance. This legal revolution is the subject matter of the present book. Like the previous edition in 2008 it examines the historical and politico-economic context in which Chinese law has developed and transformed, focusing on the underlying factors and justifications for the changes. It attempts to sketch the main trends in legal modernisation in China, offering an outline of the principal features of contemporary Chinese law and a clearer understanding of its nature from a developmental perspective. It provides comprehensive coverage of topics: legal culture and modern law reform, constitutional law, legal institutions, law making, administrative law, criminal law, criminal procedure, law, civil law, property, family law, contracts, torts, law on business entities, securities, bankruptcy, intellectual property, law on foreign investment and trade, Chinese investment overseas, dispute settlement and implementation of law. Fully revised, updated and considerably expanded, this edition of *Chinese Law: Context and Transformation* is a valuable and important resource for researchers, policy makers and teachers alike.
