

Picture Addition

First Grade

Math

Students sketch base-ten blocks in this lesson that builds both number sense and fluency adding to 20!

Learning Objectives

Students will be able to add one more or 10 more using pictures to represent quantities.

Materials and preparation

- At least 20 unifix cubes
- Class set of individual whiteboards or pieces of paper in sheet protectors
- Class set of dry erase markers and erasers

Key terms

- add

Introduction (5 minutes)

- Write the following problem on the board: "Sara collects seashells. She has 10 seashells in her collection already. Then, she goes to the beach and finds 4 more seashells. How many seashells are in her collection now?"
- Think aloud about the problem. Remind students that she started with 10, and then found more shells, so students should **add** to find the total number.
- Allow students think time, and then choose a few students to share a solution. Ask students how they solved the problem. For example, did students count on from 10 using the number line, or have the fact memorized?

EL

Beginning

- Draw a picture to represent the story problem.
- Emphasize "four more" as you read the problem.

Interim-date

- Tell students to turn and talk to a partner to share a strategy for solving the problem. List ideas for solving the problem (i.e., draw a picture or count on the number line) on the board.
- Prompt students to explain how they know Sara has 14 seashells using the sentence stem, "I know she has ____ seashells because ____."

Explicit Instruction/Teacher modeling (5 minutes)

- Tell students that today they will practice using drawings to solve addition problems.
- Remind students that when you add, you are solving for the total number. Today, students will be focusing on adding one and 10 to a number. One and 10 are sometimes called "friendly numbers" because there are patterns that can help students add using these numbers.
