

# A PERSONAL CASE STUDY

## A briefing on EHS for Health Professionals, Research Scientists, Government Officials and concerned members of the Public

### Introduction

I felt compelled to write this personal case study because through my own personal experiences I have found that there is a serious lack of understanding of what Electromagnetic Hypersensitivity (EHS), also commonly referred to as Electro-sensitivity (ES), is and its cause. For some people, EHS can be completely disabling and in some extreme situations, can lead to hospitalisation due to aggravation of pre-existing medical condition(s), development of tachyarrhythmias, which at times can result in a loss of consciousness, and other acute effects on the neurological system.

The main problem being faced by people who are suffering from EHS is that they are left in a tenuous position where there is a complete absence of government support. EHS is declared to be "not a medical diagnosis" (1) by the WHO and so sufferer's symptoms are ignored and often misdiagnosed by the medical profession. This then can lead to the prescription of unnecessary and ineffective medication. Only Sweden recognises EHS as a functional impairment while the Austrian Medical Association has provided guidelines on the diagnosis and treatment of EMF related illnesses (2)

My hope in writing this case study is to dispel misconceptions some members of the scientific community, government bodies and the general public have on this functional impairment. I also hope that by detailing my own personal experience with EHS that I can help those who may be suffering similar symptoms recognise the cause and help them understand how they can manage their condition, and to some degree, protect themselves.

### Conflict of Interests Declaration:

I would like to declare that I have no conflicts of interests. I stand to make no financial or political gains by writing this personal case study and declaring my sensitivity to EMR. By making such a declaration regarding my sensitivity, there is a real possibility that I am putting my career in IT at risk. I have reached a conclusion that my health and the health of my children are far more precious to me than the convenience offered by a mobile phone or wireless internet access.
