Assignment: Science Fair - Final Copy

Title: Toilet Paper Strength

Problem Statement: Which brand of toilet paper is the strongest?

Independent Variable: The different brands of toilet paper – Charmin, Cottonelle, and Value

Dependent Variable: The number of pennies each brand holds

Controlled Variables: The size of the toilet paper, amount of water applied to each piece, how the water is applied to the toilet paper, how the weights (pennies) are dropped

Background Information: On average, people in the United State utilize 8 million tons of toilet paper annually. Clearly, this show that toilet paper is important because everyone uses it, and people want to make sure that they're buying the best toilet paper that they can. According to the product's website, Cottonelle costs approximately \$.56 per roll, and it has one layer. This one layer is made to be soft and has moisturizer on it. The magazine Consumer Reports found that Cottonelle does not disintegrate as fast as other brands. On the other hand, Charmin costs about \$.63 per roll and has two layers. Users say that it soaks up a a lot of fluid, yet it is still sturdy and comfortable. Value brand toilet paper is the cheapest at \$.47 per roll. Like the Cottonelle, it has one layer, but it is much thinner than the other brands.

Hypothesis: The Cottonelle toilet paper will be the strongest because it feels thick, and it has a pattern on the paper that will absorb more water.

Materials:

- 3 squares of Cottonelle toilet paper
- 3 squares of Charmin toilet paper
- 3 squares of Value toilet paper
- 1 medium sized beaker
- 1 rubber band
- 100 pennies
- 1 dropper
- 100 mL of Water (in a plastic cup)

Procedure:

1. Gather all materials and place on table
2. Take one square of Cottonelle toilet paper and gently secure it to the top of the beaker using the rubber band
3. Fill the dropper up with water from the cup
4. Carefully drop 10 drops of water onto the middle of the piece of toilet paper
5. Add pennies onto the center of the toilet paper square, one at a time, until the toilet paper breaks
6. Record the number of pennies that the toilet paper held on the data table
7. Repeat steps 1-6 with other squares of toilet paper
