Topic: Business | Words: 3041 | Pages: 11

## Introduction

Ford Motor Company is an American automotive company that manufactures cars under the brand "Ford." The headquarters of Ford Motor Company is located near Detroit, in Dearborn, Michigan, USA. The firm produces a wide range of products: cars of different sizes, purposes, and costs; representative offices and factories of the corporation are scattered around the world. The firm's business mission is based on providing people with perfect products, taking into account reduced production costs. Additionally, Ford's high average annual net profits, competitive positions in the segment of inexpensive cars, and brand awareness among consumers are the company's key characteristics. Nonetheless, at the moment, the organization is facing various difficulties such as unsatisfactory product quality and design, customer criticisms, high production costs, internal and external failures, and much more. However, such production management concepts as Six Sigma, Lean Principles, TQM, SPC, and BSC will significantly offset potential adverse effects and threats due to these issues. This paper aims to identify the main problems of Ford Motor Company in the field of quality management, as well as provide recommendations for implementing the initiative to eliminate these issues.
