## Student Exploration: Weathering

**Directions:** Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

**Vocabulary:** abrasion, chemical weathering, clay formation, climate, dissolving, frost wedging, granite, limestone, mechanical weathering, rusting, sandstone, shale, weathering

**Prior Knowledge Questions** (Do these BEFORE using the Gizmo.)  
Compare the two pictures at right. Both pictures show the same kind of rock, granite.

1. Which rock do you think has been exposed on Earth's surface longer?

B

2. Why do you think so?

While A shows visibly that the rocks have aged from the rust, rust forms a bit quicker than a rocks breaking down and form into clay. B shows the rocks have gone through clay formation, which probably took decades to fully form.

### Gizmo Warm-up

When rocks are exposed on Earth's surface, they are gradually broken down into soil by the actions of rain, ice, wind, and living organisms. This process is called **weathering**. In the *Weathering Gizmo*, you will explore how weathering takes place.

To begin, select the **SIMULATION** tab. Notice the selected **Rock type** is **Granite**, a hard, dense rock.

1. Click **Play** (▶). Wait for about 5,000 simulated years, and click **Pause** (⏸). What do you notice?

The rock got smaller

2. Click **Fastplay** (⏩). Wait for about 50,000 simulated years. What do you notice?

The rock got even smaller

3. Based on your observations, is weathering a fast or slow process?

Slow process
