

GLOBAL TRENDS 2030: AN OVERVIEW

MEGATRENDS

Individual Empowerment	Individual empowerment will accelerate owing to poverty reduction, growth of the global middle class, greater educational attainment, widespread use of new communications and manufacturing technologies, and health-care advances.
Diffusion of Power	There will not be any hegemonic power. Power will shift to networks and coalitions in a multipolar world.
Demographic Patterns	The demographic arc of instability will narrow. Economic growth might decline in "aging" countries. Sixty percent of the world's population will live in urbanized areas; migration will increase.
Food, Water, Energy Nexus	Demand for these resources will grow substantially owing to an increase in the global population. Tackling problems pertaining to one commodity will be linked to supply and demand for the others.

GAME-CHANGERS

Crisis-Prone Global Economy	Will global volatility and imbalances among players with different economic interests result in collapse? Or will greater multipolarity lead to increased resiliency in the global economic order?
Governance Gap	Will governments and institutions be able to adapt fast enough to harness change instead of being overwhelmed by it?
Potential for Increased Conflict	Will rapid changes and shifts in power lead to more intrastate and interstate conflicts?
Wider Scope of Regional Instability	Will regional instability, especially in the Middle East and South Asia, spill over and create global insecurity?
Impact of New Technologies	Will technological breakthroughs be developed in time to boost economic productivity and solve the problems caused by a growing world population, rapid urbanization, and climate change?
Role of the United States	Will the US be able to work with new partners to reinvent the international system?

POTENTIAL WORLDS

Stalled Engines	In the most plausible worst-case scenario, the risks of interstate conflict increase. The US draws inward and globalization stalls.
Fusion	In the most plausible best-case outcome, China and the US collaborate on a range of issues, leading to broader global cooperation.
Gini-Out-of-the-Bottle	Inequalities explode as some countries become big winners and others fail. Inequalities within countries increase social tensions. Without completely disengaging, the US is no longer the "global policeman."
Nonstate World	Driven by new technologies, nonstate actors take the lead in confronting global challenges.

Human Progress and the Rising South Khalid Malik,Maurice Kugler,2013 The twenty first century is witnessing a profound shift in global dynamics of unprecedented speed and scale driven by the fast rising powers of the developing world What are these countries doing right What are their biggest challenges in the years ahead How will this dramatic reshaping of world politics and economics affect the wealthy industrial North as well as the poorest nations now clustered at the bottom of the Human Development Index UNDP s widely praised 2013 Human Development Report The Rise of the South Human Progress in a Diverse World addresses these questions by analysing more than forty countries in the developing world that have posted unusually rapid human development gains in recent decades drawing heavily on background research commissioned from eminent economists demographers and social scientists This companion volume to the 2013 Human Development Report

presents nine of those research papers Publisher website **Global Assessment Report on Disaster Risk Reduction 2013** United Nations,2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction UNISDR The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society **Naval War College Review** ,2013 *UCLA Pacific Basin Law Journal* ,2012 **White Paper on Science and Technology** ,2013

Europe and the Spectre of Post-growth Society Piotr Świtalski,2014 Europe has been going through its most serious crisis of values since the fall of communism In public discourse economic and social pressures have overshadowed the other dimensions of the crisis including societal values However the crisis of values would appear to be more than simply an effect of the recession Europeans have lost trust in democratic institutions at all levels European national and local Rising xenophobia and discrimination against minorities undermine the vitality of the European model of tolerance Europe is plagued by endemic corruption which costs it more than 100 billion euro annually triggering political instability Some believe that once Europe is back on the path of growth the crisis of values will disappear and that there will be a resurgence of faith in European integration But in the long term growth in Western societies may be impaired by serious headwinds resulting from demographic trends and rising inequalities and Europe may become the first post growth society European societies are already changing their traditional characteristics as a result of exposure to the effects of two global mega trends the empowerment of the individual and cosmopolitisation Can the European project be of relevance when addressing these challenges What role in this process can be played by the Council of Europe which is the embodiment of the idea that Europe is bigger than the European Union and the European agenda is richer than the economy and politics Die mediale Welt im filmischen Kosmos von "Ghost in the Shell" Patricia Cramer,2018-09-10 Studienarbeit aus dem Jahr 2013 im Fachbereich Medien Kommunikation Film und Fernsehen Note 1 8 Bauhaus Universit t Weimar Sprache Deutsch Abstract Science Fiction Autoren haben immer wieder k nftige Technologien und Entwicklungen prophezeit und die Wissenschaft inspiriert In dieser Arbeit m chte ich untersuchen in wie weit der Anime GHOST IN THE SHELL die von Lovink geschilderte aktuelle Situation erahnt und m gliche Entwicklungen bebildet hat Dabei beziehe ich mich vor allem auf folgende Aspekte die Art der Vernetzung und die Sichtweise auf diese negative Auswirkungen der neuen Medien bzw Technik und welche L sungen und Entwicklungen GHOST IN THE SHELL f r Lovinks Ausf hrungen anbietet Um aufzuzeigen inwiefern GHOST IN THE SHELL schon 17 Jahre vor Lovink gewisse Probleme thematisierte werde ich die wiederkehrende Themen beider Werke bearbeiten

Die Frage der Identität und Existenz des Individuums was das Netz generiert, Überwachung und Kriminalität sowie die Kompatibilität und Auswirkungen der Technik auf Menschen werden dabei die Hauptthemen sein. Mein Fokus liegt dabei nicht nur auf dem ersten Animefilm von Oshii Mamoru aus dem Jahr 1995 sondern auch auf der Fernsehserie von Kamiyama Kenji aus den Jahren 2002 und 2004.
