Multicriteria Location Analysis H. A. Eiselt, Vladimir Marianov, Joyendu Bhadury, 2023-03-01. This book applies Multicriteria Decision Making (MCDM) tools and techniques to problems in location analysis. It begins with a generic model for MCDM and subsequently develops specific versions of the technique for particular location problems. Throughout the book, MCDM is understood to encompass all tools and techniques that choose or rank existing or feasible solutions, including discrete multi-attribute decision making (MADM) problems which typically include an attribute table that specifies the consequences of each decision with regard to the given criteria, as well as multi-objective linear problems (MOLPs) which incorporate all objectives in a single optimization problem. The book is organized as follows: the first four chapters introduce readers to the basic tools and techniques used in single objective optimization, multicriteria decision making, location analysis, and other tools such as statistical regression and geographical information systems. This is followed by ten chapters on model applications, each of which introduces readers to a specific location problem and applies one technique to solve it. The book is then wrapped up in a closing chapter that looks at the location process from a practitioner's point of view. This book is intended as a textbook for upper undergraduate and master level courses on location analysis. It will also benefit decision makers who actually need to locate facilities.

Fundamentals of Crime Mapping Rebecca Paynich, Bryan Hill, 2013-03-18. The Second Edition of the popular *Fundamentals of Crime Mapping: Principles and Practice* walks readers through the research theories and history of GIS in law enforcement. This accessible text explains the day-to-day practical application of crime analysis for mapping. Factual data from real crime analysis is included to reflect actual crime patterns, trends, series, and what an officer or analyst can expect to see when he or she sits down to analyze and apply concepts learned. Special topics discussed include an up-to-date discussion of the current crime trends in rural and urban areas, the major ecological theories of crime, the notion of geographic profiling, empirical research using crime mapping tools, basic mapping terminology, and more. New to the Second Edition: All exercises and examples have been updated to reflect ArcGIS 10.0 and Excel 2010. Includes a workbook with engaging exercises to offer hands-on application of the material. All exercises and graphics have been updated to account for ArcGIS 10.0 and Excel 2010, though all exercises and examples for Excel 2007 remain. Contains a NEW chapter discussing the various types of policing, with an emphasis on the Compstat process, intelligence-led policing, and problem-oriented policing.
