Gizmo Warm-up

A **topographic map** is a map that contains contour lines to show elevation. Each contour line connects points that are at the same elevation. The *Reading Topographic Maps* Gizmo allows you to see how a three-dimensional landscape can be represented by a two-dimensional map.

The controls at the top of the Gizmo allow you to manipulate the landscape on the left and the map on the right. Try each tool:

- With the **Rotate** tool selected, click and drag to turn the map or landscape.
- Select **Zoom in** and click the landscape several times. Then select **Zoom out** and click the landscape again to return it to its original size.
- Click the **Add** button, and then click several times on the landscape or map to add a hill. Then dig a hole using the **Subtract** tool.
- Change the **Contour interval** using the slider. The **contour interval** is the elevation change between contour lines.
- Now use the slider to change the **Water level**. Look out for a flood!
- Try out any remaining tools and buttons on your own.
