The work presented here is generally intended for engineers, educators at all levels, industrialists, managers, researchers, and political representatives. Offering a snapshot of various types of research conducted within the field of TRIZ in France, it represents a unique resource. It has been two decades since the TRIZ theory, originating in Russia, spread across the world. Every continent adopted it in a different manner: sometimes by glorifying its potential and its perspectives, the American way; sometimes by viewing it with mistrust and suspicion, the European way; and sometimes by adopting it as is without questioning it further, the Asian way. However, none of these models of adoption truly succeeded. Today, an assessment of TRIZ practices in education, industry, and research is necessary. TRIZ has expanded to many different scientific disciplines and has allowed young researchers to reexamine the state of research in their field. To this end, a call was sent out to all known francophone research laboratories producing regular research about TRIZ. Eleven of them agreed to send one or more of their postdoctoral researchers to present their work during a seminar, regardless of the maturity or completeness of their efforts. It was followed by this book project, presenting one chapter for every current thesis in order to reveal the breadth, the richness, and the perspectives that research about the TRIZ theory could offer our society. The topics dealt with, e.g., the development of new methods inspired by TRIZ educational practices and measuring team impact.
