Everyday Science :

Everyday Science Explained Curt Suplee,1996 Why aren't these avid roller coaster riders falling right off the track? What do watery ripples have in common with lasers, earthquakes, and sound? How do aerialists and athletes keep their balance? Explore some of the fascinating facts about that most marvelous machine, the human body, as it develops from a single cell into the world's most incredible entity. These and other eye-opening insights into the realms of science fill this lavishly illustrated book. Author Curt Suplee explains the natural laws that govern the everyday lives of us all clearly, concisely, accurately, and with style. *Everyday Science: Energy Paperback* Ann Fullick,2005-10-03 Including Did you know facts, this series reinforces the concept that science is all around us every day in all aspects of our lives. Using examples from everyday experiences to explain scientific concepts, it investigates who invented/discovered, applied a theory, or made an otherwise significant advance.

Surrounded by Science National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education,2010-03-03 Practitioners in informal science settings—museums, after-school programs, science and technology centers, media enterprises, libraries, aquariums, zoos, and botanical gardens—are interested in finding out what learning looks like, how to measure it, and what they can do to ensure that people of all ages from different backgrounds and cultures have a positive learning experience. *Surrounded by Science: Learning Science in Informal Environments* is designed to make that task easier. Based on the National Research Council study *Learning Science in Informal Environments: People, Places, and Pursuits*, this book is a tool that provides case studies, illustrative examples, and probing questions for practitioners. In short, this book makes valuable research accessible to those working in informal science: educators, museum professionals, university faculty, youth leaders, media specialists, publishers, broadcast journalists, and many others. *Learning Science in Informal Environments* National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on Learning Science in Informal Environments,2009-06-27 Informal science is a burgeoning field that operates across a broad range of venues and envisages learning outcomes for individuals, schools, families, and society. The evidence base that describes informal science, its promise, and effects is informed by a range of disciplines and perspectives, including field-based research, visitor studies, and psychological and anthropological studies of learning. *Learning Science in Informal Environments* draws together disparate literatures, synthesizes the state of knowledge, and articulates a common framework for the next generation of research on learning science in informal environments across a life span. Contributors include recognized experts in a range of disciplines: research and evaluation, exhibit designers, program developers, and educators. They also have experience in a range of settings: museums, after-school programs, science and technology centers, media enterprises, aquariums, zoos, state parks, and botanical gardens. *Learning Science in Informal Environments* is an invaluable guide for program and exhibit designers, evaluators, staff of science-rich informal learning institutions, and community-based
