

Genetics I Can Statements and Study Guide

Standard 3: Life Science

Core Standard 1

Understand the predictability of characteristics being passed down from parents to offspring.

8.3.1 Explain that reproduction is essential for the continuation of every species and is the mechanism by which all organisms transmit genetic information.

8.3.2 Compare and contrast the transmission of genetic information in sexual and asexual reproduction.

8.3.3 Explain that genetic information is transmitted from parents to offspring mostly by chromosomes.

8.3.4 Understand the relationship between deoxyribonucleic acid (DNA), genes and chromosomes.

8.3.5 Identify and describe the difference between inherited traits and the physical and behavioral traits that are acquired or learned.

8.3.6 Observe anatomical structures of a variety of organisms and describe their similarities and differences. Use the data collected to organize the organisms into groups and predict their relatedness.

8.3.7 Recognize and explain that small genetic differences between parents and offspring can accumulate in successive generations so that descendants may be different from their ancestors.

Core Standard 2

Explain how a particular environment selects for traits that increase the likelihood of survival and reproduction by individuals bearing those traits.

8.3.8 Examine traits of individuals within a population of organisms that may give them an advantage in survival and reproduction in given environments or when the environments change.

8.3.9 Describe the effect of environmental changes on populations of organisms when their adaptive characteristics put them at a disadvantage for survival. Describe how extinction of a species can ultimately result from a disadvantage.

8.3.10 Recognize and describe how new varieties of organisms have come about from selective breeding.
