Virtual Wall*

A Virtual Wall creates an invisible barrier that iRobot Create will not cross by emitting infrared signals that iRobot Create sees with its Omnidirectional IR receiver. The invisible barrier can range from three to eight feet long. You can set the range of the invisible barrier by adjusting a slider bar on the Virtual Wall. To create an invisible barrier greater than eight feet wide, you may need additional Virtual Walls. To purchase a Virtual Wall, visit our website at www.irobot.com.

You can also use Virtual Walls in two of iRobot Create's built-in demos: Home and Tag. See page 6 for information on how to select and start iRobot Create's built-in demos.

- The Home demo requires one Virtual Wall. To enable the Home demo, cover the back and sides of the Omnidirectional IR receiver sensor on iRobot Create with black electrical tape. When you start the demo, iRobot Create spins until it sees the Virtual Wall Signal, then drives toward it. iRobot Create stops once it bumps into the Virtual Wall or other obstacle.
- The Tag demo requires at least two Virtual Walls, placed at least 6 feet apart. To enable the Tag demo, cover the back and side of the Omnidirectional IR receiver sensor on iRobot Create with black electrical tape. When you start the demo, iRobot Create spins until it locates one virtual wall, then drives towards it. When it contacts the Wall, it spins around until it locates the next Virtual Wall, homes on that one, and so on.

The Virtual Wall requires 2 "D" batteries and automatically shuts off after 110 minutes. If the power light blinks green, the batteries will soon need replacement.
