There are situations where an image is made of a very small object, insect, or flower for the purpose of enlarging the image. You may need to illustrate the color/texture of a surface or show the beautiful colors of the inside of a flower or capture the texture of the inside of an insect. See Figure 7-1. All of these tasks depend on your ability to photograph the subject in such a way that, when the image is enlarged, all of the important details are clear.
