professional careers from fiction and journalism to education and medicine It draws attention to the fact that a career is a particular kind of artefact with distinctive properties and features that can be analysed and compared and puts forward a new theory of the relationship between narrative methodology and the vocation of writing Career construction theory emerged in the late twentieth century when changes to the patterns of our working lives caused large numbers of people to seek new forms of vocational guidance to navigate those changes It employs a narrative paradigm in which periods of uncertainty are treated as experiences akin to writer s block experiences which can be overcome first by imagining new character arcs then by narrating them and finally by performing them By encouraging clients to see their careers as stories of which they are both the metaphorical authors and the main protagonists career construction counsellors enable them to envisage the next chapter in those stories But despite the authorial metaphor career construction theory has not been widely applied to analysis of professional careers in writing The chapters in this volume remedy that gap and in various ways apply the insights of career construction theory to analyse the relationship between writing and professional life in diverse careers where writing is used The chapters in this book were originally published in the journal *Life Writing* *Linguistic Communication Challenges Encountered by Tourists Visiting Musanze District* Jean Claude Musoni, 2018-09-24 Research Paper undergraduate from the year 2014 in the subject African Studies Linguistics grade 16 INES Ruhengeri Institute of Applied Science INSTITUTE OF APPLIED LINGUISTICS course Languages and applied linguistics language English abstract At the end of his languages and applied linguistics studies the researcher decides to carry out the research about Linguistic communication challenges encountered by tourist visiting Musanze District under the case study of VNP Area with the aim of making an assessment of linguistic skills and the level of customers satisfaction in Tourism and hospitality industry This goal was achieved under the following objectives To identify linguistic communication challenges encountered by tourists when they are being offered Tourism and hospitality services To identify the effects of linguistic communication challenges on Tourism and hospitality To suggest promising solutions to address linguistic communication challenges identified in Tourism and hospitality As far as hypotheses are concerned the researcher assumed firstly that since Rwanda a multilingual country with a single and common mother tongue Tourists are likely to encounter linguistic communication challenges Secondly unsatisfied tourists classify Rwanda as a tourists nonattractive area and thirdly training by competent language professionals is one of the strategies to address language problem The population of this research is a set of 165 Tourists who were purposively selected from the area of the study and 58 service providers who by quota sampling were segmented into 28 VNP tourists guides 15 tours guides drivers 5 community guides and 10 hotel bar restaurant as staff who necessarily interact with tourists According to the findings 86 tourists 52% tourists experienced language challenges related to the lack of knowledge of international languages cultural identification by 99 tourists or 60% while nature interpretations related problems were questioned by 66 tourists or 40% This has negative impact on 91 tourists or 55% to pay unjustified bills 41 or 25% who lose
