

## Chapter 1: The Surprising Power of Tiny Habits

"Success is the product of daily habits—not once-in-a-lifetime transformations."

"You should be far more concerned with your current trajectory than with your current results."

"Your outcomes are a lagging measure of your habits. Your net worth is a lagging measure of your financial habits. Your weight is a lagging measure of your eating habits. Your knowledge is a lagging measure of your learning habits. Your clutter is a lagging measure of your cleaning habits. You get what you repeat."

"Time magnifies the margin between success and failure. It will multiply whatever you feed it. Good habits make time your ally. Bad habits make time your enemy."

"Goals are about the results you want to achieve. Systems are about the processes that lead to those results."

"If you want to predict where you'll end up in life, all you have to do is follow the curve of tiny gains or tiny losses, and see how your daily choices will compound ten or twenty years down the line."

"Breakthrough moments are often the result of many previous actions, which build up the potential required to unleash a major change."

If you find yourself struggling to build a good habit or break a bad one, it is not because you have lost your ability to improve. It is often because you have not yet crossed what James calls, "Plateau of Latent Potential."

Bonding-Related Support in Pregnancy Presented by "APPA" (Academy-To-Promote-Prenatal-Attachment)** Christa Balkenhol-Wright,2022-06-13 Presentation slides from the year 2022 in the subject Psychology Developmental Psychology language English abstract This practical guide presents BONDING ANALYSIS a method developed by two Hungarian psychoanalysts Dr Gy rgy Hidas and Dr Jen Raffai that enables pregnant women to establish mental and emotional contact with their baby and to further develop and deepen this contact throughout the course of pregnancy It is through prenatal bonding that the pregnant woman has the

chance to play an important role in contributing to her baby's psychological and physical healthy development in utero. The significance of prenatal bonding has been worked out by experts in prenatal psychology such as Dr Thomas Verny, Dr David Chamberlain, and Dr Ludwig Janus, to name a few. One of the findings of prenatal psychology is the proven fact that everything the pregnant woman does, thinks, or feels is being transmitted to her baby via different communication channels, and everything the unborn baby experiences is stored as a memory in all its cells. BONDING ANALYSIS is a preventive method to avoid prenatal traumatization and to help dissolving blockages that may impair the building up of an intensive deep prenatal bonding between mother and baby. Christa Balkenhol Wright has developed a variant form of BONDING ANALYSIS which she also presents in this practical guide. She focuses on a bonding-related support in pregnancy, identifies emotional deficits the pregnant woman is not aware of, and applies her concept of Self-Parenting so that the pregnant woman is psychologically stabilized and empowered to deal with her pregnancy, the relationship with her partner, her life, and job situation in general in a more positive and stress-free way.
