Introduction To Finance 14th Edition:

Introduction to Finance Ronald Melicher, Edgar Norton, 2011 Business managers will gain a basic understanding of the complex world of finance with this engaging book. It presents a balanced survey of the three main areas of finance: institutions and markets, investments and financial management. The examples have been completely updated throughout to provide the most relevant information. Discussions of small business practice help them gain a better understanding of small business applications. More focus is placed on ethics to reflect the headlines in today's news. Additional end-of-chapter questions and career profile features also enable business managers to connect the material to the real world.

Research Handbook on Personal Finance Sonya Lutter, Meghaan Lurtz, 2026-01-14 This Research Handbook serves as a comprehensive guide to personal finance, providing a historical overview of the field and highlighting the importance of financial wellbeing. Expert authors bring an international perspective to modern financial issues, including proactive decision making, financial socialization, and trust, presenting a fresh take on this expanding landscape.

Signature Methods in Finance Christian Bayer, Goncalo dos Reis, Blanka Horvath, Harald Oberhauser, 2025-11-07 This Open Access volume offers an accessible entry point into the fast-growing field of signature methods in finance. It is written for early career researchers and quantitatively minded practitioners, quant analysts, and applied researchers seeking a clear practical introduction. It highlights recent developments and includes coding examples to help readers apply signature methods in practice. The advantages of modeling financial markets from a path-wise perspective rather than as a traditional series of returns are increasingly gaining recognition. Signature methods provide a parsimonious description of paths of stochastic processes, and through the signature kernel, open a rich and compelling framework at the interface between machine learning and mathematical finance. I have been extraordinarily fortunate to work alongside brilliant collaborators throughout this journey, and this book beautifully reflects the richness of that shared contribution for which I am deeply grateful.

Prof Terry Lyons, University of Oxford, Imperial College, and PI of DataSig. This fascinating collection, dedicated to Terry Lyons, offers invaluable insights into signature methods and their many uses.

Dr Hans Buehler, co-CEO XTX Markets, Quant of the Year 2022. This book provides a masterful exposition and development of signature methods in finance. It is concise, precise, and actionable. It will be an excellent source for anyone interested in modern financial engineering techniques.

Prof Alexander Lipton, Global Head of R D ADIA and Founding Member ADIA Lab, Quant of the Year 2000 and Buy side Quant of the Year 2021.
