Introduction to International Disaster Management Damon P. Coppola, 2013 [International Disaster Management Ethics](#) Liza Ireni Saban, 2016-09-30 Today's international disaster management community faces demanding political and

ethical challenges In International Disaster Management Ethics Liza Ireni Saban suggests that it is crucial for international aid organizations engaged in disaster management to attempt to lift the moral fog that envelops their practice and to alert them to the ethical implications and meaning of their decisions and actions commitment to exercising ethical judgment and leadership Drawing on examples from large scale natural disasters the 2003 Bam earthquake in Iran the 2004 Indian Ocean earthquake and tsunami the 2005 hurricanes that struck the US Gulf Coast the 2010 Haitian earthquake and the 2013 Philippines typhoon Saban applies current prominent perspectives on global justice to international disaster management arguing that a process of codification will enhance the capacity to professionalize distributive decision making Rather than being obligatory taking into account global distributive considerations will become a defining part of the profession at a global level at a time when international disaster relief is facing more and more severe natural disasters

Handbook of Disaster Research Amita Singh, 2023-09-30 This handbook is a comprehensive source of information analysis and directions in disaster studies. It goes beyond the oft-explored issues of management and science related to the topic and explores policies, governance, law, and decision-making combined with the processes of implementation and enforcement, all while integrating the latest science and technology updates related to the topic such as artificial intelligence and early warning systems. It brings together studies which relate to sociology, politics, and institutional economics which work under the impact of resource availability, issues of leadership, and international laws. Disasters are trans-boundary and disaster studies are trans-disciplinary. It is this aspect which would form the fulcrum of contributions and present a new, refreshing, and innovative design for the handbook. The transformatory pedagogy which started with the Hyogo Framework for Action 2005-2015 and The Sendai Framework for Disaster Risk Reduction 2015-2030 outlines seven clear targets and four priorities for action to prevent new and reduce existing disaster risks. The four priority areas around which the book would revolve are: i) Understanding disaster risk, ii) Strengthening disaster risk governance to manage disaster risk, iii) Investing in disaster reduction for resilience, and iv) Enhancing disaster preparedness for effective response and to Build Back Better in recovery, rehabilitation, and reconstruction.
