

INTRODUCTION TO MICROECONOMICS

MICROECONOMICS - it is a study of how individual actors make choices in response to changes in incentives, prices, resources, methods of production.

In microeconomics, we study how we make decisions as we know we don't have all the time and money to purchase everything; also, we have scarce resources. Microeconomics examines how these decisions and behaviors influence the supply and demand of goods and services and the price consumer pay. These prices influence the quantity of goods, business supply and the number of goods, customer's demand. Unlike macroeconomics, which emphasizes understanding and modeling collective behavior, microeconomics focuses on the decision-making process of individual entities within an economy.
