The author then helps them along to the more sophisticated techniques associated with connecting this network to the Internet. Focuses on the 20% of Linux networking knowledge that satisfies 80% of network needs, including the needs of small businesses, workgroups within enterprises, and high-tech homes. Teaches novices to implement DNS servers, network information services, NIS, network file systems, NFS, and all of the most important TCP/IP services, including email, Web, and newsgroup access. Explains how to set up AppleTalk and Windows NT domain servers for networks that include Macintosh or Windows systems. Comes with a CD containing the latest version of Red Hat Linux, as well as additional freeware/shareware Linux tools and network management applications. *Linux Networking Cookbook* Carla Schroder, 2007-11-26.
