Living Environment Aug 17 2012:

The Scars of Project 459 Traci Angel, 2014-03-01 *The Scars of Project 459* tells the environmental story of the Lake of the Ozarks built by the Union Electric Company in 1931. At 55,000 acres, the lake was the biggest manmade lake in the United States at the time of its completion and it remains the biggest in the Midwest with 1,100 miles of shoreline in four different Missouri counties. Though created to generate hydroelectric power, not for development, the Magic Dragon, as it is popularly known because of its serpentine shape, has become a major recreational area. Located in some of the most spectacular Ozark scenery, the giant lake today attracts three million visitors annually and has more than 70,000 homes along its shoreline. Traci Angel shows how the popularity of the Lake of the Ozarks has resulted in major present-day problems including poor water quality, loss of habitat, and increasing concerns about aging waste management systems for the homes surrounding the lake. Many in the area, especially business owners whose incomes depend on tourism, resist acknowledging these problems. *The Scars of Project 459* aims to make public the challenges facing this important resource and ensure that its future is not to be loved to death.

Ambient Assisted Living and Enhanced Living Environments Ciprian Dobre, Constandinos x Mavromoustakis, Nuno Garcia, Rossitza Ivanova Goleva, George Mastorakis, 2016-11-02 *Ambient Assisted Living and Enhanced Living Environments* Principles, Technologies, and Control separates the theoretical concepts concerning the design of such systems from their real-world implementations. For each important topic, the book bridges theory and practice, introducing the instruments needed by professionals in their activities. To this aim, topics are presented in a logical sequence with the introduction of each topic motivated by the need to respond to claims and requirements from a wide range of AAL/ELE applications. The advantages and limitations of each model or technology are presented through concrete case studies for AAL/ELE systems. The book also presents up-to-date technological solutions to the main aspects regarding AAL/ELE systems and applications, a highly dynamic scientific domain that has gained much interest in the world of IT in the last decade. In addition, readers will find discussions on recent AAL/ELE technologies that were designed to solve some of the thorniest business problems that affect applications in areas such as health and medical supply, smart city, and smart housing, Big Data, and Internet of Things, and many more. Introduces readers to technologies supporting the development of Ambient Assisted Living applications. Explains state-of-the-art technological solutions for the main issues regarding AAL and Enhanced Living Environments. Reports the development process of scientific and commercial applications and platforms that support AAL and ELE. Identifies the advanced solutions in the context of Enhanced Living Environments.

The Politics of Rights of Nature Craig M. Kauffman, Pamela L. Martin, 2021-08-17 *How Rights of Nature laws are transforming governance to address environmental crises through more ecologically sustainable approaches to development.* With the window of opportunity to take meaningful action on climate change and mass extinction closing, a growing number of communities, organizations, and governments around the world are calling for Rights of Nature (RoN) to be legally recognized. RoN advocates are creating new

laws that recognize natural ecosystems as subjects with inherent rights and appealing to courts to protect those rights Going beyond theory and philosophy in this book Craig Kauffman and Pamela Martin analyze the politics behind the creation and implementation of these laws as well as the effects of the laws on the politics of sustainable development Kauffman and Martin tell how community activists lawyers judges scientists government leaders and ordinary citizens have formed a global movement to advance RoN as a solution to the environmental crises facing the planet They compare successful and failed attempts to implement RoN at various levels of government in six countries Bolivia Colombia Ecuador India New Zealand and the United States asking why these laws emerged and proliferated in the mid 2000s why they construct RoN differently and why some efforts at implementation are more successful than others As they analyze efforts to use RoN as a tool for constructing more ecocentric sustainable development capable of achieving the 2030 Agenda for Sustainable Development goal of living in harmony with Nature Kauffman and Martin show how RoN jurisprudence evolves through experimentation and reshapes the debates surrounding sustainable development

The Meat Crisis Joyce D'Silva,John Webster,2017-08-23 Meat and dairy production and consumption are in crisis Globally 70 billion farm animals are used for food production every year It is well accepted that livestock production is a major contributor to greenhouse gas emissions The Food and Agriculture Organization of the United Nations FAO predicts a rough doubling of meat and milk consumption in the first half of the 21st century with particularly rapid growth occurring in the developing economies of Asia What will this mean for the health and wellbeing of those animals of the people who consume ever larger quantities of animal products and for the health of the planet itself The new edition of this powerful and challenging book explores the impacts of the global growth in the production and consumption of meat and dairy including cultural and health factors and the implications of the likely intensification of farming for both small scale producers and for animals Several chapters explore the related environmental issues from resource use of water cereals and soya to the impact of livestock production on global warming and issues concerning biodiversity land use and the impacts of different farming systems on the environment A final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption Since the first edition published in 2010 all chapters have been updated three original chapters re written and six new chapters added with additional coverage of dietary effects of milk and meat antibiotics in animal production and the economic political and ethical dimensions of meat consumption The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world

A Measure of the Earth Nicholas R. Bell, 2013-10-01 A Measure of the Earth provides an unparalleled window into an overlooked corner of recent American history the traditional basketry revival of the past fifty years Steve Cole and Martha Ware amassed a remarkable collection using the most stringent guidelines baskets made from undyed domestic materials that have been harvested by the maker An essay by Nicholas Bell details the long standing use of traditional fibers such as black ash and white oak willow and sweetgrass and the perseverance of a select few to claim these elements the land itself for the enrichment of daily life As they trek through woods fields farm and shore in the quest for the right ingredients for a basket these men and women cultivate an enviable knowledge of the land Each basket crafted from this knowledge provides not only evidence of this connection to place but also a measure of the earth Drawing on conversations with the basketmakers from across the country and reproducing many of their documentary photographs Bell offers an intimate glimpse of their lifeways motivations and hopes Lavish illustrations of every basket convey the humble tactile beauty of these functional vessels
