

# NYS LAB: Relationships and Biodiversity

## 1.1 Laboratory Activity for the Living Environment

### Background

Plants produce a wide variety of substances or products (**1**) in response to their growing conditions such as season, climate, and soil conditions. Some plants grow very slowly while others are fast-growing species that easily adapt to growing conditions.

Plants that are more slowly adapted to adverse conditions are more likely to produce the important substances (**2**). These include plant products that are plants (**3**). It is likely that the plants in adverse conditions are more likely to produce the important substances (**4**).

- A. 1. **What are the substances that plants produce in response to their growing conditions?**
- B. 2. **Are these substances the same for all plants? Why or why not?**

### Pre-Lab

Using the information provided, answer the questions and use the information to help you understand the lab activity.

**1. What are the substances that plants produce in response to their growing conditions?**
