The Science of AI in Water Management Frank R. Spellman, 2026-02-24 The Science of AI in Water Management offers a comprehensive exploration of how artificial intelligence is transforming the management of one of Earth's most vital resources. Written in an engaging and accessible style, the book examines AI's applications across various water management domains, including real-time water quality monitoring, leak detection, flood risk assessment, and wastewater treatment. Readers will gain insights into predictive maintenance, AI-powered irrigation, groundwater management, and the intricate relationship between AI and sustainable water practices. Addressing technical, economic, and social aspects, this book serves as a valuable resource for water managers, engineers, policymakers, students, and industry professionals. It offers insights into AI-driven strategies that promote sustainable water use, enhance water conservation efforts, and address the impacts of climate change on water resources. It includes practical case studies, real-world applications, and actionable solutions to modern water management challenges. It combines expertise from environmental science, engineering, AI technology, and policy to provide a well-rounded understanding of water management challenges and solutions. **Animal Ecology** Royal Norton
