SECTION 07500 – MEMBRANE ROOFING

SPECIFIER NOTE:

resource management: Membrane manufacturers are developing products fabricated from post-consumer materials. Refer to Section 07300 for additional information.

toxicity/EO: The cold adhesives used in adhesive application of roofing membranes are generally volatile chemicals. Roofing adhesive that is water-based and/or low-VOC is available. Refer to Section 06600 – Plastic Fabrications for information regarding plastics.

performance: Provide light colored roof surfaces to improve albedo. Membrane roofing is difficult to recycle because of the variety of materials involved and because those materials are generally adhered to each other. While reuse and recycling of membrane roofing is not typical, it is possible. Mechanically fastened membranes are easier to disassemble in the future; facilitating recycling of membrane and of substrate. Installation of a layer of sheathing between roofing insulation and roofing membrane, may allow for membrane removal without damage to insulation. FEMP maintains recommendations for roofing materials at http://www.eere.energy.gov/emp/technologies/emp_roof_products.cfm
