thousands of people run marathons and millions go jogging in local parks work out in gyms cycle swim or practice yoga The
vast majority are not engaged in competitive sport and are not trying to win any medals They just want to get fit Why this
modern preoccupation with fitness In this new book Jürgen Martschukat traces the roots of our modern preoccupation with
fitness back to the birth of modern societies in the eighteenth century showing how the idea of fitness was interwoven with
modernity's emphasis on perpetual optimization and renewal But it is only in the period since the 1970s he argues that the
age of fitness truly emerged as part and parcel of our contemporary neoliberal era Neoliberalism enjoins individuals to work
on themselves to cultivate themselves in body and mind Fitness becomes a guiding principle of social life an era defining
network of discourses and practices that shape individuals actions and self conceptions The pursuit of fitness becomes a
cultural repertoire that is deeply ingrained in our institutions and way of life This wide ranging book shows how deeply
fitness is inscribed in modern societies and how important fitness has become to success or failure recognition or exclusion
in a society that sets great store by self responsibility performance market and competition It will be of great value not only
to those interested in sport and fitness but also to anyone concerned with the conditions of success and failure in our
