

Motion Graphs – Distance/Time Graphs

Time is increasing to the right, but its distance does not change. It is **At Rest**.

Time is increasing to the right, and the distance is increasing constantly with time. The object moves at a **constant speed**.

Constant speed is shown by a straight line on a graph.

The steeper dashed line indicates a larger distance moved in a given time. In other words, **higher speed**.

Both lines are straight, so both speeds are constant.

The line on this graph is curving upwards. This shows an **increase in speed**, since the line is getting steeper.

In a given time the distance the object moves gets larger. It is **accelerating**.

Motion Graphs – Speed/Time Graphs

A straight horizontal line on a speed-time graph means that speed is constant. It is not changing over time.

There is movement at a constant speed.

This graph shows increasing speed. The moving object is **accelerating**.

This graph shows decreasing speed. The moving object is **decelerating**.
