

Chapter 1 The Role of Managerial Finance

■ Instructor's Resources

Overview

This chapter introduces the students to the field of finance and explores career opportunities in both financial services and managerial finance. The three basic legal forms of business organization (sole proprietorship, partnership, and corporation) and their respective characteristics are described. The managerial finance function is defined and differentiated from accounting and auditing. A discussion of the financial manager's goals—maximizing shareholder wealth and growth— and the role of ethics in meeting these goals is presented. The chapter then summarizes the four key activities of the financial manager: financial analysis and planning, making investment decisions, and capital financing decisions. The chapter includes discussion of the agency problem—the conflict that exists between managers and owners in a large corporation.

This chapter, and all that follows, comprises a series of chapters that play a vital role in the student's professional and personal life. Each chapter includes a list of questions of the relevance of the topic to majors in accounting, information systems, management, marketing, and operations. Throughout each chapter are detailed examples of how the chapter's topic relates to the student's personal life. These pedagogic tools should motivate students to grasp quickly an understanding of the value of the course and employ it in both their professional and personal lives.

■ Suggested Answer to Open-End Review Question

Facebook sold shares to investors at \$38 each in its IPO. One year later, its stock price was hovering around \$26. What was the percentage drop in Facebook shares in its first year as a public company? Just after the IPO, Facebook's CEO, Mark Zuckerberg, owned 443 million shares. What was the total value of his Facebook stock immediately after the IPO and one year later? How much wealth did Zuckerberg personally lose over the year?

Percentage drop in Facebook shares in its first year as a public company

$$= (\$38 - \$26) / \$38 = 100 - 30.5\%$$

Total value of Mark Zuckerberg's Facebook stock immediately after the IPO

$$= \$38 \times 443 \text{ million} = \$16,834 \text{ million}$$

Total value of Mark Zuckerberg's Facebook stock one year after the IPO

$$= \$26 \times 443 \text{ million} = \$11,518 \text{ million}$$

Total personal loss of Mark Zuckerberg over the year

$$= \$16,834 \text{ million} - \$11,518 \text{ million}$$

$$= \$5,316 \text{ million}$$
